### Green Tip of the Week: Print Preview

You print out those e-mails or web pages for sharing, filing, reminding. You retrieve your printouts and discover there's one last page slipping out that has a line or two of code that is totally useless.

Next time, before you click the "PRINT" button, try looking at the "PREVIEW." You may find you only need a page or two of a document that is several pages long.

Instead of letting the computer print ALL pages -- the default setting -- specify pages "FROM \_\_ to \_\_." You'll be surprised how many sheets of paper you save!
